Result-oriented Information Technology graduate with expertise in full-stack web development using PHP (Laravel, CodeIgniter), React.js, and Python, building scalable and data-driven web applications. Skilled in system analysis, SQL database management, and UI/UX design, delivering high-performance, user-centric digital solutions that combine functionality, efficiency, and seamless user experience.

Project Experiences

RevoU Tech Academy - **Jakarta, Indonesia** Feb 2024 - Jun 2024

Data Analytics & Software Development with AI (Independent Study)

- Managed and cleaned vending machine sales datasets and built interactive data visualization dashboards using Looker Studio to support insights-driven decision-making.
- Designed website prototypes in Figma and developed responsive web pages with HTML, CSS, and JavaScript, including data fetching, JSON conversion, and deployment for functional web applications.
- Completed and presented a capstone project integrating data analytics and software engineering using AI tools, demonstrating end-to-end workflow from data handling to web-based application deployment.

Stechoq Robotika Indonesia - **Jakarta, Indonesia** Aug 2023 - Dec 2023

UI/UX Specialist (Independent Study)

- Designed a mobile prototype “Zoneinstinct Warehouse Apps” to streamline warehouse stock management, applying Design Thinking from empathy to user testing.
- Created user flows, wireframes, system designs, and interactive prototypes using Figma, ensuring an intuitive and effective interface.
- Conducted usability and UX metrics testing to evaluate interaction efficiency and improve overall user experience.

TaniTalk - **Jember, Indonesia** Feb 2023 - Jun 2023

System Analyst & Web Developer

- Designed and developed a mobile-responsive agriculture information system using Laravel (PHP), SQL, JavaScript, and CSS, delivering a structured platform to support daily farming activities and data management.
- Produced comprehensive system design documentation (BPMN, Use Case, Activity, and Sequence Diagrams) to define user flows and streamline the development process across farmer and admin roles.
- Implemented key features such as a fertilizer calculator, plant disease information, cultivation catalog, and harvest tracking, improving usability and making information access and record-keeping more efficient.

GassIn - **Jember, Indonesia** Feb 2023 - Jun 2023

Mobile Developer

- Designed and developed using Flutter, enabling on-demand delivery of food, goods, and parcels with responsive and user-friendly interfaces for in-city operations.
- Implemented core user features including authentication (Sign In/Up), service catalog, driver tracking, and payment integration, ensuring smooth, secure, and intuitive user interactions.
- Optimized UI/UX layouts for multiple screen sizes and conducted testing and debugging of hardware-dependent functionalities (e.g., camera module) to minimize runtime issues and improve app reliability.

Human Computer Interaction Project - **Jember, Indonesia** Aug 2022 - Dec 2022

UI Designer & Frontend Developer

- Designed and developed user interfaces for restaurant and retail website prototypes, applying Human-Computer Interaction (HCI) principles to enhance usability and navigation.
- Created wireframes and interactive prototypes in Figma using a user-centered design approach, ensuring intuitive and user-friendly layouts.
- Translated visual designs into interactive Front-End elements using HTML and CSS, optimizing layout and visual hierarchy to deliver clean, responsive, and business-aligned websites for SMEs.

Education Level

Universitas Jember - **Jember, Indonesia** Aug 2021 - Mar 2026

Bachelor of Computer Science, 3.51/4.00

- Thesis: Development of a Website-Based E-commerce System for the “AKRAB” MSME Association Using the Personal Extreme Programming (PXP) Method.

Organisational Experience

UKM Olahraga MACO, Faculty of Computer Science - **Jember, Indonesia** Dec 2022 - Dec 2024

Staff of Logistics & Infrastructure

- Managed and maintained an organized inventory of sports equipment and facilities, improving asset visibility and ensuring reliable tracking for day-to-day use.
- Optimized maintenance and scheduling processes to minimize conflicts and ensure equipment readiness, supporting smooth and consistent execution of training activities.
- Coordinated with faculty staff and external parties to handle permits and logistics, contributing to well-organized operations while strengthening communication and problem-solving skills.

SISFO Cup 2023 - **Jember, Indonesia** Jan 2023 - Sep 2023

Equiment Coordinator

- Led the equipment team in planning and preparing all logistical requirements for the Sisfo CUP 2023 tournament, ensuring all materials were ready and aligned with event needs.
- Coordinated closely with the event division to manage field setup and teardown, helping ensure activities ran on schedule and without operational delays.
- Managed the division’s budget for procurement and equipment rental, ensuring cost-effective allocation of resources while meeting event requirements.

Skills, Achievements & Other Experience

- **Study Independent** (2024): Data Analytics & Software Development with AI at RevoU Tech Academy
- **Study Independent** (2023): UI/UX Specialist at PT Stechoq Robotika Indonesia
